

SEE OUR PROGRESS

IN THE BAY AREA

“I love living and working here. It’s a great place to raise a family, and this is home to me. PG&E is stepping forward, and we’re making sure the work is getting done right and getting done safely.”

—ALONZO LOPEZ
Gas Crew Foreman

Our customers are our neighbors. The communities we serve as PG&E employees are where we live and work too.

That’s why we’re investing \$4.5 billion every year to enhance pipeline safety and strengthen our gas and electric infrastructure across northern and central California. We want to tell you more about our activities right here in your community.

Throughout the Bay Area, PG&E is making progress every day. We have pressure-tested more than 50 miles of gas transmission pipeline; replaced nearly 15 miles of gas transmission pipeline; installed more than 50 automated safety valves; invested more than \$1 billion into electrical improvements; and installed smart grid technology on more than 280 electrical circuits benefiting nearly 1 million customers in the Bay Area. In the event of an outage, this “self-healing” technology minimizes the amount of customers who are without power for an extended period of time.

Together, we are working to enhance pipeline safety and strengthen our gas and electric infrastructure—for your family and ours.
